change

Chemists

 Science for a **better life**

Chemists

Wide-ranging career prospects

At Bayer you will be part of a global enterprise with core competencies in the Life Science fields of health care and agriculture. As an innovation company, we also set standards in research.

The Bayer Group offers a range of exciting opportunities in all areas of chemistry. You will develop new synthesis routes and methods, optimize and operate production processes or carry out research into new molecules.

Alternatively, you could start your career at Currenta or Bayer Business Services. These service companies offer interesting opportunities in the following areas:

- // Analytics
- // Patents
- // Environmental protection
- // Information technology
- // Inhouse consulting
- // Technical chemistry

What you offer

University graduates

You have recently completed your PhD in Chemistry with above-average grades? You have an interest in research-based questions that reach beyond the field of Chemistry? Then you will have the chance to join as postdoc.

Career entrants

To join Bayer, you need to have completed your university degree in a decent time and with above-average grades and broadened your professional skills by taking a doctoral or postdoc program. In addition, you have gained initial practical experience through internships, student jobs or as a scientific assistant at university.

Since our new products always result from interdisciplinary teamwork, you need the necessary personal skillset to complement your professional qualifications. You will fit in particularly well with Bayer if you share our passion to innovate and want your ideas and solutions to improve people's lives. You enjoy working with others and value the diversity of teams with people from different cultures and with different views. You have gained intercultural experience through internships or studying abroad and have good language skills, particularly in English. You are result-oriented and responsible, flexible and mobile.

What we offer

As an international science-based company we are passionate about innovations that improve the way people live in our world. Bayer offers an open and inspiring environment. We encourage you to question the status quo and think ahead. It takes imagination, ambition and courage to find answers to society's most pressing questions.

As a chemist at Bayer, you will be assigned to a specific area from the beginning. Following a successful start, you will have opportunities to work in different fields in Germany and abroad in the course of your career. For example, you could broaden your experience through job rotation or qualify for one of the many managerial positions which are open to chemists.
